This diagram shows a cross-section of an alternative LED package design. It features a substrate 420 with two wire bonds 411 connecting it to the bottom of the package. The package body consists of a base layer 401c, a middle layer 510a, and a top layer 510b. A central light-emitting element LE is positioned between the middle and top layers. The package is enclosed by a frame 401d, which includes side walls 401b and end caps 401a. A dimension 'd' indicates the width of the end cap 401a. Section lines A-A' and B-B' are shown.
